Our clients

Our clients - be it individuals, teams or organizations - come from various walks of life.

Some have just started their leadership journeys, others are senior leaders. Among our organizational clients are private companies as well as United Nations agencies and other international organizations.

"This program has really changed my perception of life. I have learned a lot from you. I am forever grateful for this opportunity."

Participant, 2019

Leadership Associates support individual leaders, teams and organizations in developing their leadership and collaboration capacity. Our services include coaching, workshops, leadership programs and more.

With decades of experience, Leadership Associates has fine tuned a unique blend of powerful techniques that produce change. Reliably. We work with an expansive set of carefully curated methods and we customize our approaches to meet the specific needs of our clients.

Thanks to more than 20 years of international experience in both for-profit and non-profit fields, many of our clients seek us for our expertise in gender sensitive leadership and for our capacity to drive a sustainable deep change and deliver results.

Grow with us

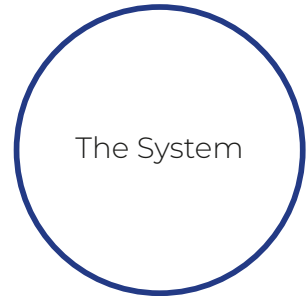

Our highly effective leadership development practices are grounded in rigorous research on leadership, adult development, neuroscience, and complexity from leading universities, including Harvard University, MIT and the University of Cambridge.

Our approaches are highly contextualized and experiential. They support personal and leadership development and transformation. Our Associates are certified in deployment of personal assessment instruments incl. the Lectical® Decision-Making Assessment and the Leadership Circle Profile™ Assessment.

"I appreciate so much your insights, excellent communication skills, and heart that you have brought to this program. You have helped me to a new level of understanding myself."

- VUCA world & complexity

We work with individual clients, with teams and with organizations.

How we work

Our services range in formats from individual coaching to open and in-house, customized leadership development programs (on-site, blended and on-line), from leadership retreats and workshops, to consulting services.

"The program was a fascinating journey of transformation and understanding oneself as a leader. I would recommend it to anybody who works in complex contexts."

Director, UN Agency, 2017

We grow and work with

Leadership Associates combines a deep theoretical knowledge with super practical tools so that individuals and organizations can expand their capacities for choice, connection and collaboration, and have the impact they envision. We are certified coaches and debriefers and we have personally tested each and every method we work with.

DEI - Diversity, Equity, Inclusion

We ground our approach in recognizing unique individuality and universal humanity in every person. With an innovative approach to social emotional learning, we bring real results to teams and individuals interested in change and true inclusion.

Individual & Group Coaching

Our coaching is catalytic. It rapidly accelerates the leaders' development. We challenge and support leaders in overcoming their limiting beliefs as they access choice, connection and collaboration. Our coaches are accredited with the International Coaching Federation.

Neuroscience-based Transformational Techniques

We integrate neuroscience based techniques such as EMDR, hypnosis and neuro-linguistic programming to powerful, life changing instruments that deliver tangible results, rapidly. Most people need only one session of rapid transformational technique (RTT, based on Marisa Peer) to let the root of their issue go for good.

Leadership Development Instruments

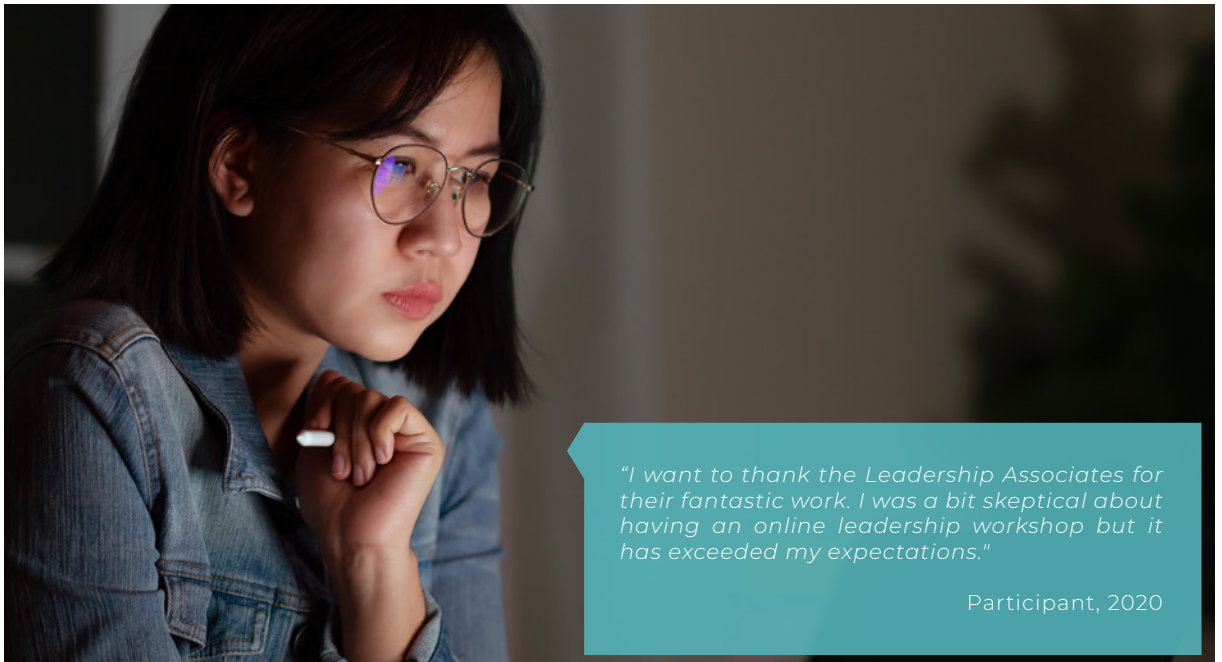

The LDMA (Lectical® Decision-Making Assessment) supports the development of key decision-making skills — collaborative capacity, perspective coordination, contextual thinking, and decision-making process. The Leadership Circle 360° Profile assesses your competencies as well as the underlying habits of thought. Our certified debriefers guide you through your detailed personal profile and determine the desired next steps with you.

Conscious Leadership

Conscious work with integrity, energy, commitments, self-leadership and mindset is at the core of our leadership development work. We introduce our clients to powerful ways to connect mind and body, and develop a graciously relaxed leadership presence so that they can act with confidence and in alignment with their values when it matters most.

Complexity I Cynefin

We play with complexity and complexity plays with us. What about you?

"I want to thank the Leadership Associates for their fantastic work. I was a bit skeptical about having an online leadership workshop but it has exceeded my expectations."

Participant, 2020

I Leadership Associates

Our international team brings extensive inter-cultural experience and rigorous training in adult development, leadership coaching and facilitation from Europe and the US. We work on-site and online in English and several other languages.

"The Women's Leadership Program goes to the heart of who you are, what drives you and how you can bring out the very best elements of yourself. It is a wonderful opportunity."

Director, UN Agency, 2017

"Leadership Associates has far exceeded my expectations with their highly customized and extremely insightful workshops and coaching. One thing I have learned: you will not leave their workshops unchanged!"

When working with groups, the team created a safe environment in which I was comfortable being challenged. The expert guidance of Blanka and Tereza helped me to change my perspective and enabled me to move forward in my decision-making. I decided to take on additional coaching sessions with the team of Leadership Associates to address the underlying themes and step fully into my role as a leader.

By working with Leadership Associates, I have created room for what is really important. Highly recommended."
